

In 1 l or 100 ml bottles, similar to those pictured

## Nickel-free blacking sets

**Blacking and re-blackening steel, aluminium, iron, castings, brass, copper, bronze and tin. For use in mechanical engineering, toolmaking, model making or for weapon maintenance.**

### Degreaser

The alcoholic degreaser removes grease and persistent soiling deposits. **KBS 1010** degreaser comes ready to use.

### Brushed blacking

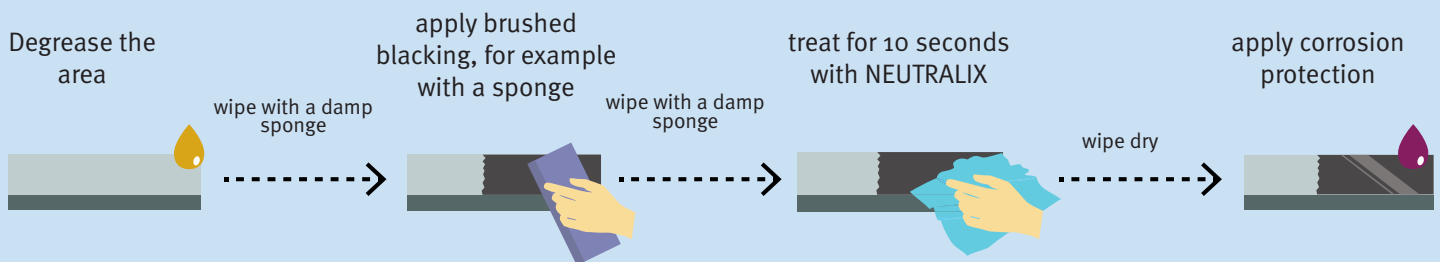

You can blacken using cloths, brushes or sponges – with the brushed blacking solution. **KBS 3005** for iron, castings, steel, tin  
**KBS 3015** for brass, bronze, copper  
**KBS 3075** for aluminium

### Neutralix

Supplement works as a corrosion inhibitor for rinse water to maintain the pH level above 7. Provides very good neutralisation after low-temperature blacking.

### Corrosion protection oil KBS 4900 – dry protect

Corrosion protection for blackened parts. Free from organic solvents; guaranteed long-lasting corrosion protection and a dry surface.

The KBS 100 ml burnishing sets are supplied in practical storage boxes, with 1 l to a carton
